### Release of New Product

Dear Business Partners,

We are pleased to announce that we are launching the “ULTY-V plus Display Option Program” as a new product of our boiler control optimization system (ULTY).

This new product meets modern needs by enabling the display and output of information on fuel reduction and CO<sub>2</sub> emissions, both in real time and over a period of time.

For more information, please see the product leaflet. If you have any questions, please contact us at:
